HVF-100

Diagnostic accuracy, Easy to use

Standard Goldmann White-on-White Perimeter

Full compliance with the Goldmann standards, White stimulus on white background light test.

LED Light Source

It adopts LED light source for perimeter configuration which is life time long and light declination low. During the usage, no need to calibrate the LED bulbs periodically or replace it.

Auto Eye Recognition

System recognizes OD/OS automatically and alarms to indicate operator, which is helpful to avoid mistakes during test.

Pupil Diameter Measurement

Auto pupil diameter measured during test for correcting visual error.

Built-in PC For Space-saving

Takes up less space and minimizes software errors in comparison to using external PC and Monitor.

Motorized Head-rest and Chin-rest

Allow operator to easily lead examinee into the right position by adjusting Left & Right and Up & Down of examinee.
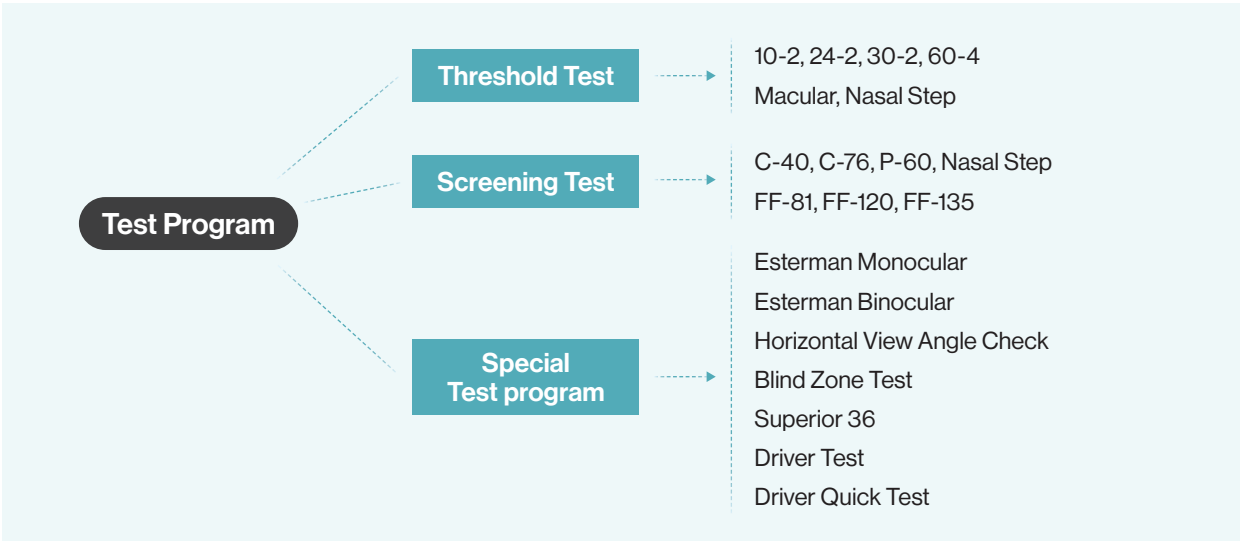

Voice Guidance For Fast and Accurate Test

Guides examinee how to perform examination and has examinee feel comfortable during whole test.

DICOM Support

Data operation for patient information uploading and downloading.
